

Sioux Cleaning Equipment for Oil and Gas Applications

Explosion Proof & Non-Explosion Proof Hot Water Pressure Washers & Steam Cleaners

Sioux's line of 100% all-electric cleaners are ideal for cleaning onshore and offshore drilling equipment. They are great for general maintenance as well as cleaning oil-based mud, grease sludge, grime, and for thawing frozen lines and drains.

Units are Third-Party Certified and ETL listed to UL-1776 and CAN/CSA C22.2 No. 68-92. Units produce zero emissions meaning no exhaust, no fumes, and no open flames. Sioux's line of all-electrics comply with the Clean Air Act and emit no contaminants into the air, making them safe to use in areas that cannot tolerate air contamination.

With a Sioux all-electric cleaner, discharge water temperature is maintained during long periods of operation, resulting in optimum cleaning capability. Other brands use a holding tank for the hot water and as the holding tank water is depleted, discharge temperature decreases, reducing cleaning effectiveness.

Explosion-proof models are designed for operation in hazardous conditions. Explosion-proof models are additionally third-party certified to UL-1203 and CAN/CSA C22.2 No. 30.92.

Sioux manufactures over 50 standard models of all-electric steam cleaners, pressure washers, and combination units with ratings from 0.8- 8 GPM and 100- 3,000 PSI. An extensive array of options are available to enhance performance including 50 or 60 Hz electricals, SCR temperature controls, and hose reels.

Sioux specializes in providing custom units to meet your exact specifications. We have the engineering staff and experience to provide drawings and submittal packages for the most complex projects worldwide.

Sioux Manufactures over 50 standard models ranging from 0.8 - 8 GPM and 100 - 3,000 PSI

FUEL-FIRED PRESSURE WASHERS & STEAM CLEANERS

Sioux also manufactures a complete line of electric fuel-fired and engine driven fuel-fired pressure washers and steam cleaners. These units are approved for indoor and outdoor use giving greater flexibility for all your applications. Sioux Dakota units are available with LP, natural gas, or oil (diesel) fired burners.

COLD WATER PRESSURE WASHERS

Only Sioux cold water pressure washers are designed for long life and continuous use in heavy-duty applications to blast away dirt and grime on drilling equipment. Units are built with heavy-duty pumps, motors, and frames and can withstand severe conditions. Cold water washer can be built to explosion-proof specifications, with alternate electricals, or as portable engine driven units.

LOW-PRESSURE STEAM GENERATORS

Sioux Steam-Flo® Steam Generators are ideal for degassing tank cars and oil tankers. The Steam-Flo® provides continuous, unlimited steam, is easy to install and operate, and is built to last. Mountings include portable, stationary, or over-the-road trailer. The unit can be outfitted with an optional water tank and generator for complete self-contained operation.
